

ANALOG

by Amanda Deo

We're going to talk about our future in cassette tapes. We're going to talk about our future like the Rick Dees Weekly Top 40. Like there are 40 great songs this week about our future. Like there are great songs about how I will wait for you and untether you and then glitter bomb the shit out of our loneliness. Great songs about the things I will miss when you leave me like:

*doo- wop-doo-wop-doo-wop,
put your head on my shoooooooooulder,
won't you come home tonightttttt.*

There is gold being recorded inside your bones on the radio. Gold is being recorded in a studio inside your anatomy like slow thunder. We're laying on our backs and stealing love from the ceiling. *Put that cassette on again. Play it again.*
