

I Wish

by Jerry Ratch

I wish
I had money
I would give it all to you

I would give you more than I could imagine
I would pull the fetus out of your heart
Between my two fingers
And glue us together

I would glue our faces together too
After putting in all my wishes
That have ever come true
Ever come true

After finding out that
You were at the center of all that is
And all that ever was, or will be
